

Property Expansion Project

PURPOSE:

Build a Youth Center and ministry home on previously proposed 3 acres of property.

WHY:

Because every kid deserves a chance at succeeding.

CAPACITY:

Currently we can serve a maximum of 25 students with RE-Direct and we can't expand beyond that because of space restrictions. With a Youth Center we would have the capacity to go to 75 students.

In addition the plans for the facility include a game/youth room that would be open M-F after school from 3-6 which would be a monitored area that gives kids a safe place to go, play games, hang out, watch movies, etc. With a small "café" we could offer simple food items that are healthy and good for kids to purchase (small fee). The café would not be a profit center but a way of someone learning the value of items and offering the pride involved in buying something. We would also have the facility open on Saturday's doing the same thing. Facility would be open after football games on Friday offering the "5th quarter".

Wednesday night would be a planned youth group night where we would share the gospel and God's word. Friday nights, after games, would also become a time that we would share the gospel with students.

The house would be a place where Phil and Kym would live as well as the place where teams and volunteers would stay. It would become a home away from home for those that are coming to participate in the mission.
